## CHAPTER ONE: Fundy Marine Ecosystem Science Project: Science overview (*G.R. Daborn*)

[1.] Introduction	1	Geomorphology	2	Dynamic Relationships	2	History of Resource Use	5
History of Research	5	New Concerns	6	New Initiatives	7	References	8

## CHAPTER TWO: The physical environment of the Bay of Fundy (*D.A. Greenberg, B.D. Petrie, G.R. Daborn and G.B. Fader*)

2.1	Physical oceanographic processes	II
[1.]	Introduction	11
	L'Etang Inlet studies.,,	11
	Classification of Estuaries Project	12
	Historical temperature-salinity observations	12
	Tidal variations	26
	What has changed recently?	26
	A new generation of numerical models	26
	Future work	27
	Conclusions	37
2.2	Sedimentological processes	28
2.2.1	Sediments: intertidal and benthic	28
[1.]	Introduction	28
	Minas Basin studies	28
	Annapolis Basin studies	30
	Sediment, issues	30

2.2.2	Marine aggregate assessment: and sediment transport	30
[1.]	Mineral Development Agreement Project	30
	Scots Bay Sand Wave Field	30

[1.]	Resource potential	3i	Multibeam bathymetry	31	Margaretsville Dunefield	31	Seabed	
	erosion	33	Bottom fishing impacts	33	Sediment transport	33	Future research	33
2.3	References							34
CHAPTER THREE: The chemical environment of the Bay of Fundy								
<i>(P.G. Wells, P.D. Keizer, J.L. Martin, P.A. Yeats, K.M. Ellis and D.W. Johnston)</i>								
[1.]	Introduction	37	The water column and water and sediment quality					37
[1.]	Inorganic nutrients		37	Organic nutrients				38
3.23	Nutrient dynamics							38
[1.]	Plant pigments and phytotoxins	39	Metals	40	Radionuclides			40
[1.]	Introduction	40	Seawater	40	Sediments	41	Air	41
	freshwater environments		,	42	Birds	42	Chernobyl	43
3.2.7	Organochlorines, organometals and other persistent toxic substances....							43
[1.]	Water	43	Sediments	43	Research and monitoring needs			44
3.2.8	Industrial, food processing and fish plant wastes							44
3.3	Chemical contaminants in food chains and tissues							44
[1.]	Introduction	44	Seston and plankton	45	Benthic invertebrates	45	Fish	46
47	Marine mammals							49
3.3.6.1	Contaminants in harbour porpoises							49
[1.]	Introduction							49
[1.]	Heavy metals	49	Organochlorines	50	Summary			50
3.3.6.2	Contaminants in seals							50

3.3.6.3 Contaminant in whales	50
[1.] Ecological significance of contaminant burdens in biota	51
recommendations	55

3.4 References	56
----------------	----

## **CHAPTER FOUR: The biological environment of the Bay of Fundy**

(M. Brylinsky, G.R. Daborn, D.J. Wildish, M.J. Dadswell, P.W. Hicklin, C.D. Duncan, W.T. Stobo, M.D. Brown and S.D. Kraus)

[1.] Introduction	63	Primary production	63
[1.] Introduction	63	Phytoplankton,	63
Benthic microalgae	64	Seaweeds,	64
Sail marsh	65		
4.3	Zooplankton		66
[1.] Zooplankton surveys	66	Zooplankton of the Bay of Fundy	67
Basin		Zooplankton of Minas	68
4.4	Benthos		69
[1.] Subtidal	69	Benthic-pelagic coupling	69
Intertidal benthos	70	Perspective on benthic	
biological research; 1983-95			72
[1.] Introduction	72	What have benthic biologists been up to since 1983?	72
versus applied research		Fundamental	
	73	Future directions	73
[1.] Fish	74	Birds	76
[1.] Introduction	76	Waterfowl	76
[1.] Seaducks	76	Geese and dabbling ducks	83
4.6.3	Shorebirds		84
[1.] Abundance and distribution of Semipalmated Sandpipers	84	Diets and foraging	
ecology of sandpipers and plovers			85

[1.]	Diet	85	Foraging ecology	86	Sediment types and <i>C. volutator</i>	86
[1.]	Impacts of bait harvesting and barrage construction on sediments, invertebrates and shorebirds					86
[1.]	Changes in sediments and invertebrates 1977-1993					87
4.6.3.3	Phalaropes in. the Bay of Fundy					87
[1.]	Red-necked Phalarope	87	Red Phalarope			88
4.6.4	Seaducks					88
[1.]	Eider ducks	88	Impacts of rockweed harvesting			89
4.6.5	The seabirds of Machias Seal Island					89
4.7	Marine Mammals					89
4.7.1	Seals and seal issues ,					89
[1.]	Background....	89	Seal issues	90	Information needs	91
4.7.2	North Atlantic right whales					92
[1.]	Introduction	92	Designation of conservation areas	93	Concerns	93
	History of right whale research project in the Bay					94
4.8	References					94
<b>CHAPTER FIVE: Marine resources of the Bay of Fundy</b>						
<i>(J.A. Percy)</i>						
[1.]	Introduction	103	Status of marine resources			105
[1.]	Pelagic fish	105	Demersal fish	107	Diadromous fish	110
	plants	112	Aggregate extraction			119
5.3	Aquaculture					119
[1.]	Introduction	119	Species in culture	120	Potential constraints on aquaculture development	121

[1.] Tidal currents,121	Winter temperature121	Pollutants122	Diseases and parasites122	
Predators123	Toxic phytoplankton blooms123	Habitat degradation123	Conflicts with other users	124
5.4	References			125
CHAPTER SIX: Bay of Fundy ecosystem issues: a summary ( <i>J.A. Percy and P.G. Wells</i> )				
[1.] Introduction	139	Environmental issues		142
6.2.1 Fish stock declines				142

[1.]	Resource use cascade	142	Resource management paradigm	143	Changes in fish assemblages....	143
			Geomorphologic and oceanographic changes	143	Climatic and atmospheric changes.....	144
			Marine contaminants	144	Nutrient inputs	144
					occurrence of natural toxins	144
[1.]	Physical stresses in rivers and estuaries	145	Changes in saltmarsh/mudflat dynamics	145		
	Disruption of sediment/Corophium/shorebird links	145	Marine habitat alterations	146		
	Aquaculture impacts and conflicts	146	Ecotourism and recreation	147	Marine transport at ion	
	Coastal development ,	147	Introduced species	147	Marine mammals: fisheries and aquaculture interactions	148
			Cumulative and synergistic effects	148	Designation of marine protected areas	348
			Critical land-sea interactions	348	Integrated coastal zone management	348
			indicator/sentinel species	348	Protection of coastal fossil outcrops	148
6.3	Scientific questions pertaining to the environmental issues					149
[1.]	Physical oceanography and sedimentology.....	149	Chemical environment			149
	Biological environment	149	Marine resources	149	Broader issues	150
6.4	References					150

## CHAPTER SEVEN: A Workshop Synthesis

(J.A. Percy, P.G. Wells, A.J. Evans, and D.C. Gordon, Jr.)

[1.]	Introduction	151	Why a Bay of Fundy research initiative?	15 J	Information needs and research directions	153
[1.]	Workshop synthesis	153	Resource management and science	154	Upper Bay and lower Bay	155
[1.]	Upper Bay working group	155	Lower Bay working group			156
[1.]	Toxic chemicals	156	Resource harvesting and aquaculture			157
7.3.4	General information needs and research directions					158

[1.] Oceanography	159	Geology and sedimentology	i 60	Biology, ecology and resource	
management	160	Research methodology and new initiatives			163
[1.] Use of existing data	163	Monitoring	164	Modelling	165
Marine protected areas				New technologies	166
7.3.5 Sustaining the momentum					166
[1.] Developing an action plan	167	Fostering research	167	Communication and cooperation	
167 Involving the public			168	Fundy workshops	168
[1.] Bay of Fundy Ecosystem Project: A proposed action plan	169	Related initiatives			171
[1.] Short-term	171	Medium-term	172	Long-term	172
7.6		Concluding remarks			172
 <i>APPENDICES</i>					
<i>Appendix 1. Conceptual models for reference at the workshop</i>					173
<i>Appendix 2. Workshop agenda</i>					185
<i>Appendix 3. Workshop participants</i>					187
<i>Appendix 4. FMESP bibliography</i>					191
