1 Chapter One - Another Test

This is a sentence that has no included equations

$$a = b + c \tag{1}$$

This sentence includes the following inline equation which says that I wonder if $\alpha = \beta + x/\delta$ and which clearly makes no sense. Or, $a = b * \sqrt{c + d}$.

Here is a reference to [Blais 1988] and another to [Tan et al. 1999], for another example.
