

Senior Clinical Consultant Opportunity

This senior-level consultant will assist our hospital clients with all aspects of clinical informatics. Application areas may include, but are not limited to: clinical documentation and care planning, bedside medication verification and administration, emergency department documentation, surgery management, and computerized physician order entry.

InfoPartners is considering candidates who are Information Systems professionals with skills in clinical documentation, bedside medication verification/administration, emergency department documentation, and/or computerized physician order entry. RN required, MSN preferred. Previous job experiences that are applicable include hospital IS clinical systems analysts or systems vendor implementation specialists.

Travel is required, but is manageable, and resources are provided to work out of your home. You will find our InfoPartners consulting team to be very knowledgeable in both systems and workflow/operational issues, working together in a cohesive, supportive, and professional manner.

Since 1986, InfoPartners has served the IS/IT management and consulting needs of hospitals. Visit www.infopart.com to learn more about our firm. Please send resume and salary history to InfoPartners, RE: Senior Clinical Systems Consultant at info@infopart.com or fax to (615) 297-4932.
