

APL2007, Montreal, October 21-23

The APL 2007 conference, sponsored by ACM SIGAPL, has as its principal theme "Arrays and Objects" and, appropriately, is co-located with OOPSLA 2007, in Montreal. APL 2007 starts with a tutorial day on Sunday, October 21, followed by a two-day program on Monday and Tuesday, October 22 and 23.

APLers are welcome to attend OOPSLA program events on Monday and Tuesday (and OOPSLA attendees are welcome to come to APL program events). Registrants at APL 2007 can add full OOPSLA attendance at a favorable price.

Sunday	Oct 21	Tutorials
Monday, Tuesday	Oct 22,23	APL 2007 program
Monday-Friday	Oct 22-26	OOPSLA program

Register on-line at <http://www.regmaster.com/conf/OOP07/oop07.pdf>

APL 2007 Costs (US\$)	SIGAPL and ACM members	Non-members	Students
Early registration (by 9/13)	350	400	75
with OOPSLA	795	895	200
Registration	400	450	75
with OOPSLA	895	925	200
Tutorial day	250	250	25
Single conference days	200	200	

Program

APL 2007 keynote speaker: Guy Steele, Sun Microsystems Laboratories

Tutorials

- Using objects within APL
- Array language practicum
- Intro to [language] for other-language users
(We expect that there will be at least one introductory tutorial on "classic" APL, and hope to have introductions to a variety of array languages)

For additional program details, see the APL2007 page at <http://www.sigapl.org/APL2007.html>

Committee

General Chair	Guy R. Larocque	Guy.Larocque@nrcan.gc.ca
Program Chair	Lynne C. Shaw	shaw@acm.org
Treasurer	Steven H. Rogers	steve@shrogers.com
Publicity	Mike Kent	mkent@acm.org

Call for participation

We solicit papers and proposals for tutorials, panels and workshops on all aspects of array-oriented programming and languages; this year we have particular interest in the themes of:

- Integrating the use of arrays and objects
- Languages that support the use of arrays as a central and thematic technique
- Marketplace and education: making practitioners aware of array thinking and array languages

Our interest is in the essential use of arrays in programming in any language (though our historical concern has been the APL family of languages: classic APL, J, K, NIAL and other related languages).

Due Dates for Contributors:

Tutorial, panel, and workshop proposals, and notice of intent to submit papers, are due as soon as possible (preferably by the end of June), to the Program Chair.

Contributed papers, not more than 10 pages in length, are due by **Monday, July 30**, to the Program Chair. Details of form of submission can be obtained from the program chair.
